

Hydenmet Solutions

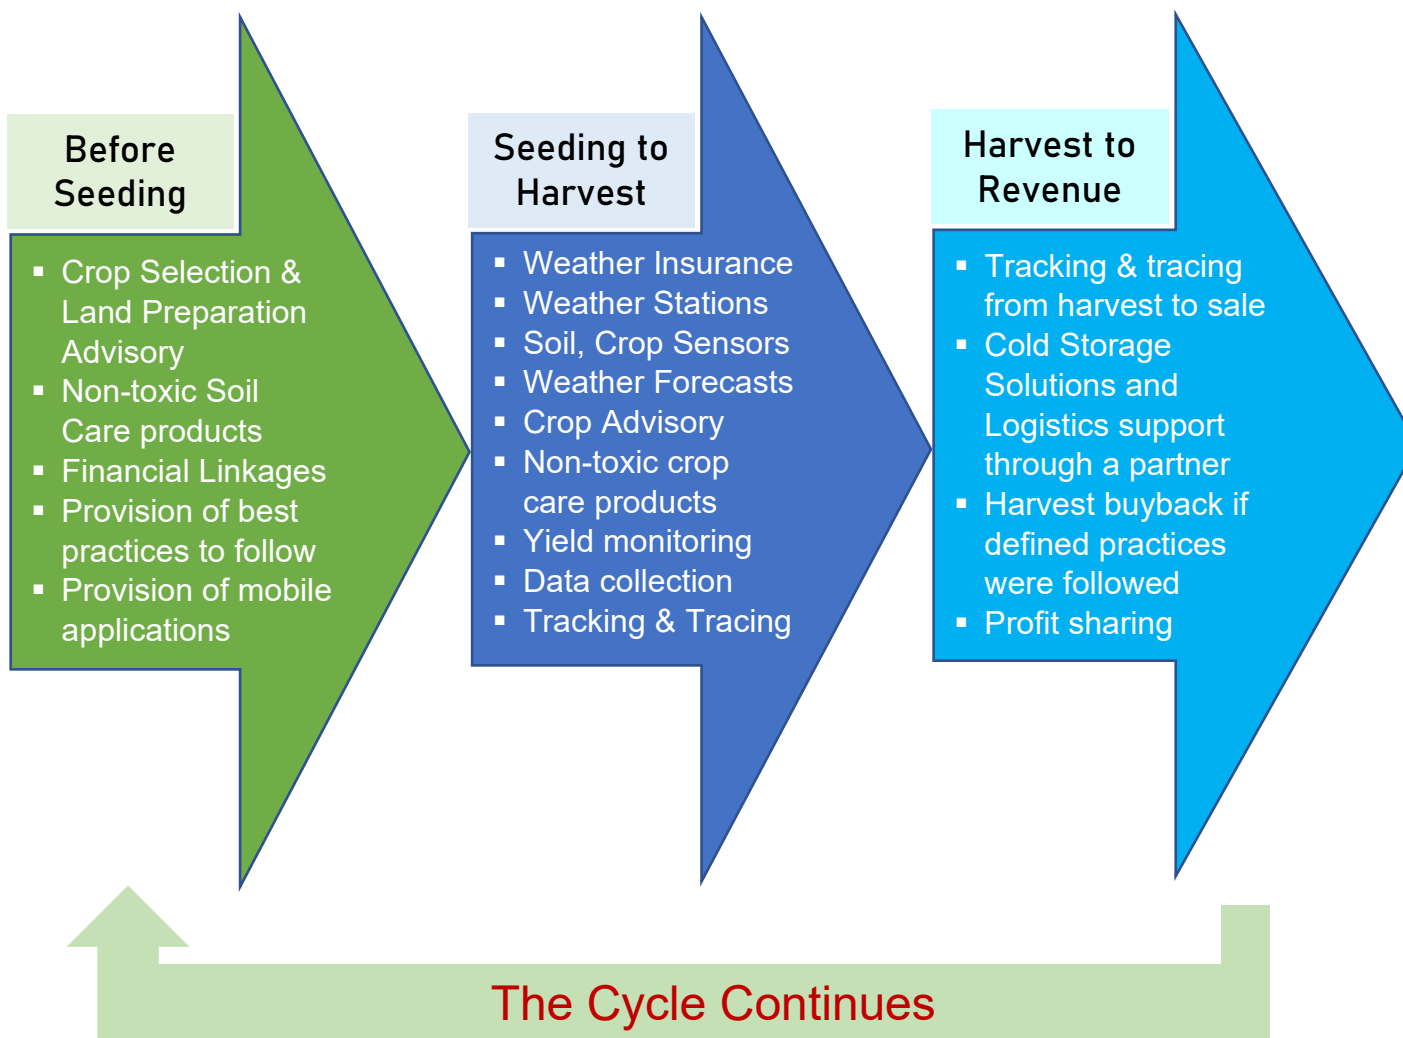

Presents **STAGE**
Your Cultivation Partner

STAGE expanding to Smart Technology-Based Agriculture Enabler is a Technology Platform offering monitoring of cultivation & weather/crop advisory AND a personalized marketplace for the small & marginal farmers through FPCs (Farmer Producer Companies:

- Monitoring of cultivation using drones, IOT devices and satellites; app-based monitoring of best practices – weather & crop advisory specific to crop & location thereby mitigating risk of crop failure using technology
- Personalized marketplace for every FPC covering access to finance, quality inputs, parametric insurance, farm equipment and market (for best prices)

As a part of the **STAGE** program, **HYDENMET** deploys educated staff who are trained on the technology platform to work closely with farmers – one staff per 250 acres of cultivation

HYDENMET brings technology from its partners across the world

Earth Networks is a world-leader in weather solutions. They run the largest weather network in the world with over 1800 lightning sensors and over 12,000 automatic weather stations, serving over 104 countries.

Davis Instruments is a world leader in Agri-tech. Their Enviro Monitors and sensors are widely used in advanced countries for providing effective weather and crop advisory.

[Drones for Imagery & Spraying] – Indigenous drones which are highly customizable. They are battery operated and hence environment friendly.

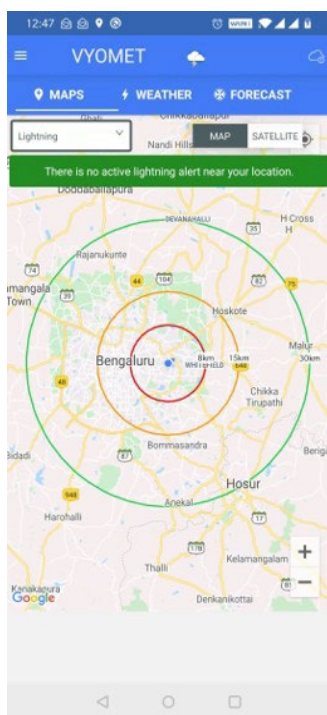

Payload can be customized and additional sensors can be deployed.

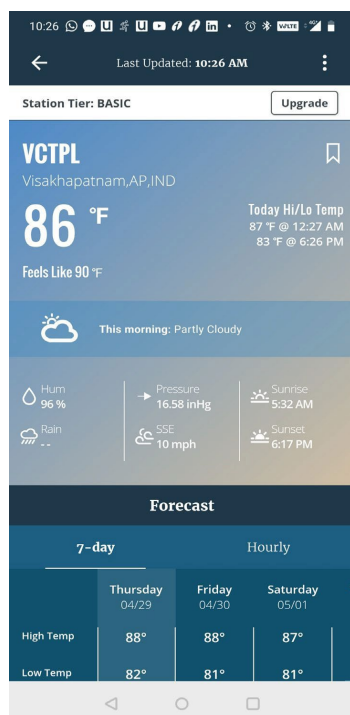

Green Earth provides a wide range of eco-friendly and non-toxic crop & soil care products; over time farmers can stop using chemical based fertilizers, pesticides and insecticides, saving on costs.

Weather & Crop Advisory through Mobile Apps, SMS and E-Mails

VYOMET

WEATHERLINK

MOBILIZE

STAGE

Customized Web / Mobile Application covering:

- ERP
- SCM
